## Product Description:

Our color-coded flowchart details the essential steps to determine if donors meet the FDA's definition of a prior resident of a malaria-endemic country as well as additional steps to determine if prior residents have cleared the applicable deferral requirements.

- Addresses each critical decision point
- Includes directions to specific reference lists
- Provides documentation prompts

## Specifications:

- Double Sided
- Color-coded
- 110 lb card stock
- 10 mil Lamination
- Can be marked and erased repeatedly with either dry-erase or wet erase (Vis-à-Vis®) markers (not included)

**NOTE:** Our flowchart is intended as a supplement the AABB DHQ flowchart, not as a replacement for any aspect of the AABB DHQ. Also, our flowcharts are designed to be used in conjunction with our Malaria Risk Map Collection and includes specific references to various sections of the maps collection.
